Hearing Aids

ONAAPH offers a range of hearing aids adapted to different levels of hearing loss, including for children. The models cover mild, severe, and profound hearing loss, with various amplification options.

THE BEHIND-THE-EAR (BTE) RANGE)

ULTRA POWER

For profound hearing loss, it offers maximum amplification to compensate for severe auditory deficits. It is ideal for improving hearing and speech comprehension.

SUPER POWER

Designed for individuals with severe to profound hearing loss, the Super Power model provides high-intensity amplification enabling the detection of faint sounds and the comprehension of speech, even in acoustically challenging environments. These devices are engineered for durability and reliability, offering substantial and sustained auditory support.

POWER

Designed for mild to severe hearing loss, providing appropriate amplification to improve hearing and speech comprehension in various situations.

POWER PERFORMANCE

Designed for severe to profound hearing loss, providing powerful amplification to improve hearing and speech comprehension in challenging environments.

THE IN-THE-EAR (ITE) RANGE

A highly discreet hearing device that fits entirely within the ear canal, providing effective amplification for mild to severe hearing loss while being barely visible.

Completely In Canal_CIC

In The canal - ITC

Partially visible in the ear canal, offering a balance between discretion and amplification. It is designed for severe to profound hearing loss, while providing improved comfort and functionality.

HEARING AID MAINTENANCE ACCESSORIES

Hearing Aid Batteries

Our hearing aid batteries are designed to provide reliable and long-lasting performance, ensuring continuous power for your hearing devices.

Available in different types.
